PACKAGE GUIDE · 2026

FOR SERVICE FIRMS

Your site should sell.

Website + CRM + billing on one platform: a site that brings leads, an admin that keeps them, GST invoices in one click, and search that finds you.

WHY

A pretty site is not a system.

Most service firms have a brochure website, leads arriving by email, WhatsApp and phone, invoices in a spreadsheet, and no idea whether Google or AI assistants can read them.

TODAY

Scattered

- Leads in five inboxes, some never answered
- No record of which page or campaign brought them
- Quotes and invoices typed in Excel or Word
- GST split worked out by hand each time
- Every text change waits for a developer
- Google can't read the site; AI answers skip you

WITH P26

One platform

- Every inquiry in one admin inbox, with status and notes
- Page and UTM source saved with each lead
- GST quotes and invoices as branded PDFs
- CGST + SGST or IGST picked from the place of supply
- Pages, work, pricing and posts edited by you
- Sitemap, structured data and llms.txt built in

This guide shows the platform we built and run for ourselves at **p26.co**. Every screen is real: public pages from the live site, admin screens from a demo account with fictitious data.
