TEAM JOB & TIME-BLOCKING SAAS · 2026

FOR FOUNDERS AND SERVICE FIRMS

Every job on the right slot.

Your own team job and time-blocking app, under your brand: recurring jobs, calendars, time sheets, quick links, a super-admin portal and per-seat subscriptions. Sell it as a SaaS or run your own firm on it. Ready in 15 days.

WHY

WhatsApp is not a job tracker.

Most service firms still hand out work in chats and track it in spreadsheets. Deadlines slip, nobody can see who is overloaded, and salary time means adding up hours by hand.

TODAY

Scattered

- Jobs assigned on WhatsApp
- Recurring filings remembered by one person
- Status means asking everyone
- No view of who is overloaded this week
- Hours and salary worked out in a spreadsheet
- Links to sheets and portals lost in chats

WITH P26

One system

- Every job set up once, with a link to the work
- Recurring patterns: daily to yearly
- Each person's day on My Calendar
- The whole team on one Team Calendar
- Hours logged against every job
- Quick links to every tool, per person

This guide shows the system as we built it for **TidySlot**, a job and team management SaaS for service firms in India (**tidyslot.com**). Public pages are from their live site. App and super-admin screens come from a demo firm with fictitious data.
